

LMNTRIX INTELLIGENCE

THEY'RE ATTACKING.
ALL THE TIME.

Every organization is under threat—yet most are drowning in noise. What if you could turn “all this data” into clear, proactive defence?

LMNTRIX
BE THE HUNTER | NOT THE PREY

01

LMNTRIX INTELLIGENCE IN A NUTSHELL

We aggregate data from 300+ threat intelligence sources, correlate billions of indicators, and map global threat activity to your environment in real time. Then we give you full access to our XDR TIP.

DETECT EARLIER. RESPOND FASTER.

Because connecting global threat intelligence to your telemetry lets you spot threats before they escalate. Making response a matter of speed, not luck.

The screenshot displays the LMNTRIX web interface. The top navigation bar includes tabs for HUD, KILLBOX, EXPLORE, INTEL (active), INCIDENTS, REPORTS, and CONFIG. A left sidebar shows a user profile for Carlo Minassian and a menu with options like OVERVIEW, INTELLIGENCE, ATTRIBUTES, SCREENSHOT, THREATS, COMMENTS, PROPERTIES, and INDICATORS. The main content area is titled 'ns2.hosting24.com' and shows an 'Unknown risk' status. It features a 'Highlights' section with details about an SSL certificate found, domain registration information for Arizona, Domains By Proxy, LLC, and GoDaddy.com, LLC, and mentions of CloudFlare Technologies. A right sidebar lists 'Events' such as 'Registered', 'Added', 'Cert.issued', 'Updated', 'Scanned', 'Seen', 'Cert.expires', and 'Expires' with their respective timestamps. At the bottom, a table shows intelligence data:

Intelligence	Name	Value	Message
STATUS	2001	SUCCESS	Succeeded to generate reputation

WHAT SETS US APART

- Rich threat feed from open, proprietary & dark web sources
- Context: MITRE ATT&CK mapping, threat actor attribution
- Integrated sandbox analysis, IOC detection & validation

04

TURNING INDICATORS INTO INSIGHT

We map adversary tactics and threat actors. We enrich your alerts. We reduce false positives. We give you a proactive edge.

risk evaluation

149.28.56.246

- Found in threat feeds
- Recently registered
- SSL certificate expired
- Hosted on common ISP

github.com

- Found in threat feeds
- Returns PTR records
- Top 100K domain
- Top 10K domain

HOW IT OPERATES

1. Ingest indicators from 300+ global feeds
2. Enrich with DNS, WHOIS, HTTP headers, SSL, etc.
3. Risk-scoring, IOC lifecycle, threat aliasing — all part of the workflow

INTELLIGENCE THAT MATCHES YOUR RISK PROFILE

Whether you're operating in finance, healthcare, manufacturing—or any geography—we tailor our insights to what matters to you.
